To whom it may concern,

I strongly oppose the passing of S 2934. Allowing for a different minimum salary for workers in Providence Public Schools is hugely unfair. Teaching in this district is difficult, and there are already many unfilled positions due to teacher choosing to work at other districts or at private schools. There is a teacher shortage, and teachers will choose the best options for themselves.

Passing S 2934 would reduce the number of teachers willing to work for PPSD and hurt the students in Providence, which is already a district facing many challenges.
