The Honorable Hanna M. Gallo
Chairperson, Senate Committee on Education
Room 313
Rhode Island State House
Providence, RI 02903

Re. Testimony on Senate Resolution 3009

Dear Chairperson Gallo,

I am writing on behalf of the Rhode Island Public Expenditure Council (RIPEC) in support of Senate Resolution 3009 which would create a special legislative commission to study shared services and the potential for the regionalization of school districts in Rhode Island.

Depicted in the figure on the following page, many Rhode Island school districts are relatively small, and declining enrollments are making them smaller still. Between FY 2020 and FY 2026, total Rhode Island public school enrollment fell by 7,635 students (5 percent), while enrollment in school districts declined by 12,637 students (10 percent). In many districts, including several of the state's smallest, the decline has been far more pronounced. Four districts—Little Compton, Narragansett, South Kingstown, and Westerly—have seen declines exceeding 20 percent. In Little Compton and Narragansett, enrollment has fallen by at least 25 percent.

As a result, many districts are now notably small: 14 enroll fewer than 2,000 students, and six enroll fewer than 1,000. These trends are not expected to reverse. For example, in October 2026, Narragansett enrolled just 51 kindergarten students compared to 100 12th graders. Westerly enrolled 122 kindergarteners vs. 177 12th graders, while South Kingstown enrolled 128 kindergarteners vs. 183 12th graders.¹

These trends exacerbate longstanding structural challenges. Rhode Island's K–12 system has long struggled to achieve economies of scale, and continued enrollment declines are intensifying these

¹ RIDE, [Reports](#), October Enrollment.

challenges. Research suggests that districts can be both too small and too large to operate efficiently and effectively, with one review of peer-reviewed studies conducted between 2007 and 2018 finding that the most efficient district size generally falls between 1,500 and 3,000 students.² A number of Rhode Island districts are already smaller than this range, with additional districts expected to shrink to below these levels in the next several years.

There are also indications that taxpayer dollars are not being deployed efficiently or effectively. Of the 50 states, Rhode Island ranked eighth highest in per pupil spending and sixth highest in terms of the ability of residents to pay (per \$1,000 of personal income) in FY 2023.³ Nevertheless, student outcomes in math and reading proficiency are middling.⁴

Beyond fiscal efficiency, the small size of districts raises concerns about educational opportunity. Smaller districts often struggle to provide comprehensive programming, including Advanced Placement courses, specialized instruction, and extracurricular activities.⁵

Other states facing similar challenges, particularly those with rural or fragmented district structures like New York and Maine, have pursued shared services, regional collaboratives, and district consolidation to improve efficiency and expand student opportunities.⁶ Rhode Island, by contrast, does not face the same geographic or

transportation constraints, yet has not systematically pursued these strategies. At the same time, the experiences of these states provide valuable models that Rhode Island could draw upon to make our K-12 system more efficient and effective.

While regionalization may ultimately prove to be the most effective long-term solution, there are a range of approaches worth evaluating, including shared administrative services, joint purchasing, and programmatic collaboration across districts. Given the state’s ongoing enrollment decline, these challenges will not abate—they will intensify.

For these reasons, we support Senate Resolution 3009 and the creation of a commission to study these issues in greater depth and identify solutions.

Sincerely,
