

Testimony in support of S2529: Next Generation Public Buildings Act

Barbara Walsh, 62 Frederick Street, Warwick, RI 02888

Date of Hearing: April 15, 2026

To: Chair Sosnowski and the Honorable Members of the Senate Environment and Agriculture Committee

This is a reasonable and proactive bill which will reduce energy emissions from one of the most prevalent sources of carbon emissions – buildings. There is an urgency to reduce such emissions which I do not believe government officials are responding to. Requiring new or renovated buildings to adopt these standards is a commonsense place to start. “Leading by example” thus far is seriously underwhelming and should be more vigorously initiated by government leaders. For climate reasons and future long term energy cost savings this bill should be embraced.
