

Dear Senate Committee on Environment and Agriculture,

My name is Christopher Cheney, I live in Providence, and I am writing in support of bill S2529. We need to protect our state from the harms and volatility of fossil fuels, and this would be a small change with a large impact. In addition to improving our air and allowing us to take advantage of our own clean energy sources, this would create living demonstrations of better heating sources for new buildings or renovations.

Sincerely,  
Christopher Cheney
