

Senate Environment and Agriculture Meeting, April 15, 20  
Next Generation Buildings senate testimony [SLegislation@rilegislature.gov](mailto:SLegislation@rilegislature.gov)

## **In favor of S-2529 Next Generation Buildings**

My name is Jim Sedgwick and I live in West Warwick.

This important common-sense legislation reduces carbon emissions by requiring new municipal buildings to use clean energy instead of fossil fuels. It costs nothing for ratepayers and taxpayers, Best of all, it won't add construction costs, since all-electric buildings are equivalent or cheaper than fossil fuel based buildings. Please don't allow this remarkable opportunity to pass us by. Vote in favor of S2529. Thank you.

Sincerely, Jim Sedgwick,  
West Warwick
