

Senate Environment and Agriculture Meeting, April 15, 2026
Plug-in Solar senate testimony SLegislation@rilegislature.gov

In favor of S-2658 Plug-in Solar

My name is Jim Sedgwick and I live in West Warwick.

This bill provides Rhode Islanders with a practical and inexpensive way to join the solar power revolution. Best of all: it adds no cost to either ratepayers and taxpayers. This is a proven, safe approach to solar panel technology which has been in use by over a million households across Europe. Please don't let this fantastic opportunity pass us by. Vote yes on plug-in solar.

Sincerely, Jim Sedgwick,
West Warwick
