

Testimony Re: Senate Bill 2663 - Healthy School Meals for All
Senate Finance Committee
May 19, 2026
Stephanie Geller, Deputy Director

Mr. Chairman and members of the Committee, thank you for the opportunity to provide testimony today. Rhode Island KIDS COUNT is part of the **Healthy School Meals for All Coalition and the Rhode Island Interfaith Coalition to Reduce Poverty, both of which have made this bill a priority.** Today we would like to voice our support for Senate Bill 2663, which would **establish a Healthy School Meals for All program in Rhode Island public schools phased in over three years,** starting with elementary schools, followed by middle schools and high schools. I would like to thank Senator Vargas for sponsoring this bill and Senators Acosta, Mack, Appollonio, and Quezada for co-sponsoring. We would particularly like to thank Senator Acosta who has been working on this issue for the past few years and has introduced a similar bill, Senate Bill 2083.

During the COVID-19 pandemic, the USDA provided funding for schools to offer meals free of charge to all students. When this funding ended in June 2022, schools went back to collecting school meal applications and incurring and trying to collect school meal debt from families who struggled to make ends meet. This system creates stress and work for families and schools.

Since the pandemic ended, nine states have made Healthy School Meals for All permanent. These states include our neighbors in Maine, Massachusetts, New York, and Vermont and farther afield, California, Colorado, Michigan, Minnesota, and New Mexico.

Why are so many states providing Healthy School Meals for All – because it simply makes sense for our kids, our schools, and our state.

Children cannot learn on an empty stomach. According to the 2025 RI Life Index, a survey conducted by Blue Cross & Blue Shield of Rhode Island and Brown University, more than one-third (34%) of Rhode Island households report not being able to meet their basic food needs. Children who are hungry are more likely to have behavior, emotional, and academic problems and are more likely to be tardy or absent from school, be suspended, and repeat a grade.

Providing free school meals to all students will reduce stigma and improve equity. Providing free meals for all students increases school meal participation by removing the stigma often associated with school meals.

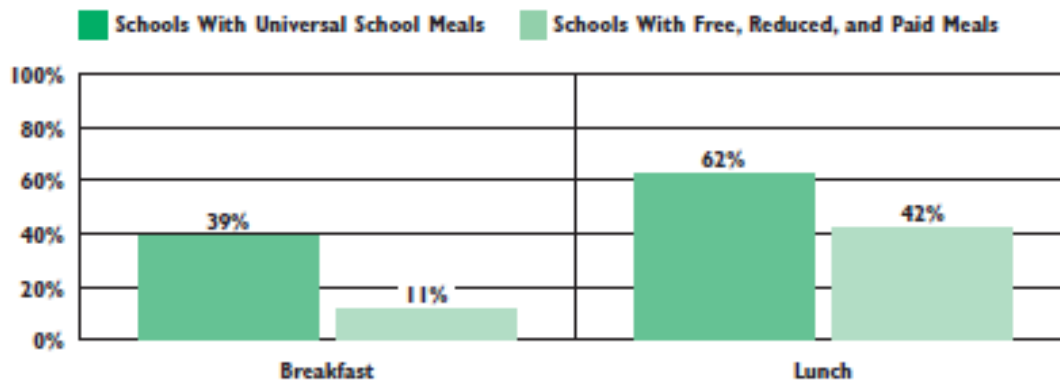

Providing free school meals for all students would reduce administrative costs. Schools spend a tremendous amount of time and effort collecting and processing school meal applications and collecting unpaid school meal debt. This bill would ease the administrative burden for schools and end the problem of unpaid school meal debt.

This bill includes provisions that will maximize federal funds available to support school meal programs and encourage models like breakfast in the classroom and grab-and-go breakfasts that allow more children to participate.

Rhode Island KIDS COUNT has been encouraging schools to adopt policies and practices that improve school breakfast participation for a long time, including breakfast in the classroom, breakfast after the bell, universal school breakfast, and the Community Eligibility Provision. We have been focused on this issue because we know that access to healthy school meals supports academic success and improves attendance, behavior, and health, including reducing obesity rates.

**Percentage of Children Participating in School Meal Programs,
Rhode Island, October 2025**

Source: Rhode Island Department of Education, Child Nutrition Programs, Office of School Health and Wellness, October 2025.

Earlier this month, Rhode Island KIDS COUNT released the *2026 Rhode Island KIDS COUNT Factbook*, and I encourage you to review our indicator on *Children Participating in School Meals*, which includes additional data and information this Committee might find helpful as you deliberate.

The FY 2025 budget included \$813,000 to provide free breakfast and lunch to the 6,500 students who were previously receiving reduced-price school meals. This expansion was a good start, and phasing in a Healthy School Meals for All program over the next three years would allow us to build on this momentum.

We urge this committee to pass this bill so all children in Rhode Island have access to the nutritious school meals they need to learn and thrive. Healthy School Meals for All is a key ingredient our state needs to improve educational outcomes. This is an investment that Rhode Islanders overwhelmingly support and that is needed to fight hunger and ensure that children are ready to learn. We think our children and our schools are worth it.

Thank you for the opportunity to provide this testimony.
