

Good evening,

My name is Jason Romblad, I am a lifelong unaffiliated voter from Woonsocket. I am writing to voice my opposition to Senate resolution S2825, which will appropriate \$5 million to RIPTA, to spend, in part, to implement the State's Act on Climate goals. These goals are unrealistic, costly & unneeded. Several Rhode Island administrative agencies have sent letters stating it is not possible to do this, with the Governors office even questioning the constitutionality of this act. You can hear Rep Speakman state this during a committee hearing here(32:10 mark): <https://capitolvri.cablecast.tv/show/11906>

RI taxpayers have been told this act was needed to save money, but let's be honest, that was and is a lie. Our energy rates are 48th in the country and this legislature continues spending our tax dollars on these failed policies.

Please vote against this bill.

Thank you,

Jason Romblad
