

Good evening,

My name is Jason Romblad, I am a lifelong, unaffiliated voter from Woonsocket.

I am writing tonight to voice my support for this bill #2844. I am a former smoker who quit smoking cigarettes with the help of an electronic vape device. I had smoked cigarettes

for 25 years from 1987-2012, ending at 2 packs per day, when i switched to a vape device.

I was able to lower the level of nicotine in the vape, over time, and after 5 years I was able to put the vape down in 2017. I have not used a vape device since, nor have I smoked

another cigarette. I also used flavored vapes like "pink bubblegum" and "strawberry", amongst other flavors.

I am asking that this bill be passed for two reasons:

1: Vape devices can be an effective tobacco cessation product.

2: Prohibiting adults from using these products is anti American and anti freedom.

Please pass this bill through committee and stop the prohibition of these products.

Thank you,

Jason Romblad
