

April 28, 2026

Dear Members of the Senate Finance Committee,

I write in strong support of S3231, the Green Bond, and urge you to ensure it includes robust funding for farmland and open space preservation.

Rhode Island's natural landscapes and working farmland are irreplaceable assets for our communities, our food system, and our shared quality of life. The Green Bond is one of our most effective tools for protecting them for future generations.

I strongly urge the committee to make this bond as green as possible and send a strong signal that Rhode Island is committed to protecting our land, air, and clean water.

Thank you,

Josh Daly
