Subject: Senate bill #2116

Chairwoman Murray and members of the Senate Health and Human Services Committee

As an 83 year old woman, I now often face the difficulties in caring for my aging feet and I am relatively agile. Routine care isn't just cosmetic but impacts my ability to walk without pain. Many of my peers are less able to manage their foot care at home.

I urge your support for this bill that enables certain at home footcare for older adults. Home-based footcare supports prevention and early identification of concerns.
