

To: RI Senate Committee on Health and Human Services

In support of S-2455

I am writing in support of this very important bill that will require insurance companies to cover scalp cooling treatments. A diagnosis of cancer is devastating and the side effects of chemotherapy, which often includes hair loss, are very trying emotionally and physically to patients. The scalp cooling treatments are a way to reduce the side effect of hair loss and should be available to patients without being a financial hardship for them. It is important that we assist others who are struggling with this burden. Please support this bill.

Thank you,

Nicole Kettelle
