Testimony in support of S2905: Decarbonization Demonstration Initiative Act of 2026

Camille Nixon, Warren, RI 02885

Date of Hearing: April 9, 2026

To Chair Bissaillon and the honorable Members of the Senate Housing and Municipal Government Committee:

Geothermal energy is one of the most energy-efficient, emissions free and low-cost alternatives for heating and cooling larger buildings. It is imperative that we get away from burning fossil fuels and geothermal energy would be important in that goal. If we are serious about stopping climate change, we need to find alternative energy sources that are clean, like geothermal.

I support the bill because it would provide funding and a process to allow the building owners to study feasibility of converting their buildings to geothermal heating and cooling.

Please bring the bill to a vote in 2026.

Thank you very much for considering my input, and thank you to Senator Euer for introducing this important bill.

Thank you for helping to protect our planet.

Camille Nixon
