Subject: In Favor of S-745, S-746, and S-747

To whom it may concern:

I am writing to indicate my support for the following bills: S-745, S-746, and S-747.

The work of the Senate Study Commission delivered clear and positive legislative direction to the city of Providence regarding measures that will lead to much needed improvements to the administration of, and outcomes delivered by our public school system.

The children of this city deserve the best public education that we can provide. I believe that these three bills represent critical changes that will lead to the improvements we all want for our children, the teachers, the administrators and leadership of our public schools. Enacting these changes will enable us to keep our promise to the citizens of Providence who pay taxes with the expectation that our leaders are committed to collaborating to deliver a quality public school system that meets the needs of all stakeholders, especially the students.

Thank you for all your do for Providence!
